ABOUT US

Our business and our reputation are built on the quality of our design, our local manufacturing expertise and our customer care. Working with architects and designers, we create toilet and shower cubicles that function beautifully, and provide lasting style and elegance. The product line of Toilet Cubicles, Changing Room Toilet Cubicle, Mall Toilet Cubicle Partition, School Toilet Cubicle Partition, Ceiling Hung Model Bathroom Cubicle, Flexible Toilet Cubicle Partition, Shower Cubical Fitting, Commercial Toilet Cubicle etc., that we offer are a perfect combination of cutting-edge innovation, excellent performance and great aesthetics; all that are available to satisfy the most basic needs of humans. Carefully designed to fit as per the users requirements, both in terms of visual appeal and functionality; our cubicles and fittings are highly demanded in various sectors

WHY CHOOSE US...

Apart from being assured of outstandingly beautiful results, there are many other reasons why you should consider choosing us

High performance

In the detailing and engineering of all our Toilet Cubicle Partition, we bring a high level of quality visually and technically. We incorporate modern building systems together with age old joinery techniques, creating spaces that fuse elegance and beauty with high performance efficiency

Market Leader in toilet partitions

Throughout the years, Scranton Products has developed new products using HPL including lockers, bathroom partitions, shower cubicle, urinal partition, dressing room. These product introductions were designed to provide products that perform better in their applications than traditional materials while providing improved aesthetics and lower maintenance

Cost effective

Our clients often tell us that when comparing like for like we offer the most competitive pricing in timber frame and oak frame design and construction.

Professional service

Working closely with engineers, architects and various timber frame industry specialists, our team provides imaginative and uniquely detailed structures.

Market Leader in toilet partitions

Throughout the years, Scranton Products has developed new products using HPL including lockers, bathroom partitions, shower stalls, benches, dressing compartments and vanity tops. These product introductions were designed to provide products that perform better in their applications than traditional materials while providing improved aesthetics and lower maintenance

HPL Laminated Board Sheet

Technology at work

The High Pressure Laminated boards, conforming to IS: 20146, are manufactured under a special process and a strict quality control regimen. The board is made out of cellulosic material whereas its core is made of layers of cellulose which are impregnated with thermosetting phenolic resin. The decorative design paper on either side of the board is impregnated with special melamine resin. This is manufactured under a very high temperature and a high pressure in a multi-daylight press in which resin polycondensation takes place to give the end product the desired extra toughness and durability.

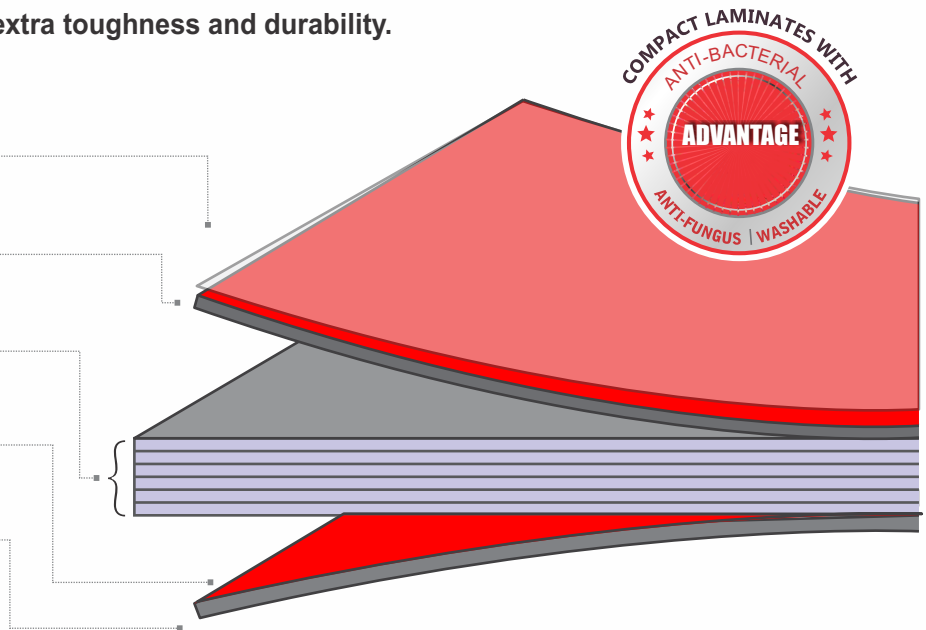

Tissue overlay (for print decors)
Impregnated with melamine resin
